

Mums Who Bake

Using your usual cupcake recipe (don't have one? See our recipe section!)
- add the mixture to ice-cream cones instead of cupcake cases!!

- 1 Place the ice cream cones in a muffin tray.

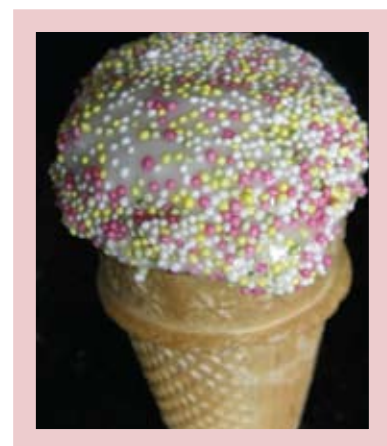

- 2 Using an ice-cream scoop add the mixture into the cones. Don't Overfill!

- 3 Bake in the oven (180°C) for 15 minutes or until you insert a cake tester and it comes out clean.

- 4 Place on a cooling rack to cool down. Once cooled top with icing. We've used glace icing here but you could ice on buttercream to make it look like a Mr Whippy! To add sprinkles - tip the sprinkles into a bowl then dip the icing topped cone into sprinkles to get a good covering. Best made on the day of eating.

What child wouldn't love these for their birthday party?
